

## Hungary → Finland

Dog Import Checklist & Quick Guide | TailHarbor | Updated April 2026

### KEY INFORMATION

SIMPLE ROUTE: EU Pet Passport accepted

|                            |   |
|----------------------------|---|
| <b>Preparation Time:</b>   | 1-2 weeks   |
| <b>Microchip:</b>          | ISO 11784/11785 (must be implanted BEFORE rabies vaccination)                           |
| <b>Rabies Vaccination:</b> | Required. Minimum 21 days before travel (primary). Keep boosters current.               |
| <b>Titer Test:</b>         | Not required (EU-listed/equivalent origin)  |
| <b>Documentation:</b>      | EU Pet Passport with current microchip + rabies records                                 |
| <b>Tapeworm Treatment:</b> | REQUIRED for Finland. Praziquantel, 1-5 days (24-120h) before arrival, by licensed vet. |
| <b>Cropping/Docking:</b>   | Dogs with cropped ears or docked tails may face import restrictions in Finland          |
| <b>Registration:</b>       | Local registration required within 4 weeks of arrival                                   |
| <b>Entry Points (BIP):</b> | Helsinki Airport for non-EU arrivals  |
| <b>Import Authority:</b>   | Ruokavirasto (Finnish Food Authority)   |

### USEFUL TIPS

- Start the process as early as possible. Delays with lab results or vet appointments can push back your timeline significantly.
- Research airline pet policies early. Some airlines have limited cargo spots, especially in summer. Temperature embargoes apply above 30C / below -5C at any transit airport.
- Start crate training weeks before travel. A calm, crate-confident dog will have a much less stressful journey.
- The tapeworm treatment for Finland must be given by a vet 1-5 days (24-120 hours) before arrival. Schedule this appointment well in advance -- too early or too late means refusal.
- Non-EU arrivals into Finland must enter through an approved Border Inspection Post (BIP): Helsinki Airport for non-EU arrivals.

### PRE-TRAVEL CHECKLIST

#### EARLY PREPARATION

- Confirm your dog's breed is permitted in Finland
- Research airline pet policies and book cargo/cabin spot
- Purchase IATA-approved travel crate (correct size for your dog)
- Begin crate training

#### MEDICAL REQUIREMENTS

- Microchip implanted (ISO 11784/11785) -- BEFORE vaccination
- Rabies vaccination administered (min. 21 days before travel)
- Tapeworm treatment (praziquantel) scheduled 1-5 days (24-120h) before arrival in Finland

#### DOCUMENTATION

- EU Pet Passport up to date with current microchip + rabies records
- All vaccination records compiled
- Copies of all documents made (2 sets)
- Airline booking confirmation printed

#### TRAVEL DAY

- All original documents in carry-on bag
- Crate labeled with your name, phone, destination, and 'Live Animal'
- Water dish filled and attached inside crate
- Arrive at airport early (3+ hours for international with pet)

#### AFTER ARRIVAL IN FINLAND

- Present documents at Travellers' Point of Entry / Border Control
- Register dog with local municipality within 4 weeks
- Register with local veterinarian
- Obtain pet liability insurance (recommended)
