### USEFUL TIPS

- Start the process as early as possible. Delays with lab results or vet appointments can push back your timeline significantly.
- Book your FAVN titer test at an EU-approved lab early. Processing takes 7-14 days, and if results come back below 0.5 IU/ml, you'll need to re-vaccinate and re-test (resetting the 90-day clock).
- Keep your dog's rabies vaccinations current with no gaps. If there's a lapse, the titer test validity may be lost and you'll need to restart the process.
- Submit your 48-hour pre-notification to Mattilsynet before arrival. Entry is through Oslo Gardermoen or Storskog only.
- Tapeworm treatment (praziquantel) is required 1-5 days before arrival. Schedule this appointment carefully.
